

ABOUT INSUROPE

Single employer solution with a Stop Loss after 2 years

We are one of the longest established global pooling networks with more than 50 years of multinational experience. We partner with many of the world's leading employee benefits specialists and have a global presence in over 100 countries serving more than 800 multinational clients with 4,500 pooled country plans.

What is pooling?

Multinational pooling offers clients the potential to realize economies of scale and reduce the cost of their employee benefits provision through the payment of multinational dividends.

The multinational company places their insurance policies with the Insurope Network Members in each country. These policies are then combined to form the Insurope pool. Importantly, in each country these policies remain insured with local insurers and so benefit from local terms and conditions, administration and claims settlement.

At the end of each accounting period, the local results are consolidated, where claims and expenses for each country within the pool are offset against premiums, to calculate the overall multinational account result.

Insurope offers seven standalone pooling systems, which provide different levels of protection. The most suitable type of pool is determined based on size and attitude towards risk.

What is 2-year Stop Loss?

2-year Stop Loss provides full protection of your multinational account result after 2 years. It is a single employer pooling system in which a multinational dividend is paid annually.

50% of positive results are paid out in the 1<sup>st</sup> year (50% carried forward) and at the end of the 2<sup>nd</sup> year the accumulated result is paid out after loss compensation. Accumulated losses are cancelled by the Insurope Network after 2 years.

2-year Stop Loss is a benefit to multinational organisations that are more likely to experience greater volatility in claims or are more risk averse.
